SHOULDER ARTHROSCOPY
TO ARTHROPLASTY
SYMPOSIUM 2023

SCIENTIFIC PROGRAM

**ANKARAN,
SLOVENIA**

18TH AND
19TH MAY
2023

Dear friends and colleagues!

We would like to personally welcome each and every one of you to the Shoulder Arthroscopy to Arthroplasty Symposium 2023 – Current Concepts in Shoulder Pathology, from Instability to Arthroplasty. It is a thrilling time for shoulder surgeons as we continue to grow, always remaining adaptable, motivated and open to new ideas and different perspectives. Shoulder surgery is confronting a time of many changes, and we are encountering these changes during a period of large nation-wide and global transformation. The world of shoulder pathology is an exciting area – one that we specialise in – and it will always continue to bring inspired people together.

An exciting two-day program with experts from across Europe awaits us:

Six live surgeries, from stemless anatomic and reverse shoulder arthroplasty with navigation to dynamic anterior stabilization, distal clavicle bone block and Latarjet.

Trendy techniques in instability management – from soft tissue procedures and Latarjet to newly established bony procedures.

Shoulder arthroplasty with a focus on stemless designs, spacing from total to reverse. One of the hot topics will be navigation systems, which will be used in the arthroplasty live surgeries.

Discussions about most of the hot topics in shoulder pathology – periprosthetic infections, complications after stabilization, bone loss and new insights in tissue healing – and the opportunity to bring your own case.

We would like to provide you with new ideas and present the latest achievements in the treatment of shoulder pathology, which will hopefully inspire you in your future work. The whole event will be recorded and stored on the Beemed platform.

We would like to thank each of you for attending our symposium and bringing your expertise to our gathering. Throughout the symposium we ask you to stay engaged and proactive, and to help shape the future of shoulder arthroscopy and arthroplasty.

With kind regards,
The Organizing committee
